EDUCATION

University of Toronto

Toronto, ON

Honours Bachelor of Science in Computer Science (Co-op) — **GPA: 3.96/4.00**

Expected May 2027

Courses: Data Structures, Operating Systems, Databases, Software Design, Systems Programming, Machine Learning

EXPERIENCE

Software Engineer Intern

05/2025 – 12/2025

Geotab

Toronto, ON

- Built a Claude-based **AI agent** that auto-generates Storybook components, saving 8–12 developer hours per sprint
- Optimized SQL batch processing pipeline in **C#** by debugging bottlenecks, doubling throughput to 21K+ devices.
- Built **React/TypeScript** features for 100K+ users, improving UI load times by **code-splitting** and **lazy loading**
- Reduced frontend latency by 33% by migrating store data fetching to **React Query caching**, eliminating 500+ redundant API calls, verified by Chrome Lighthouse
- Built **Jest unit tests** and **Selenium integration tests** with 80% coverage and improving frontend reliability
- Shipped features via **Docker-based CI/CD** pipelines, conducted **code reviews** on Git, and collaborated with cross-functional **Agile teams** to understand system architecture and navigate a massive codebase using Jira

Software Developer Intern

05/2024 – 09/2024

Adamjee Life Insurance

Karachi, Pakistan

- Built end-to-end UI features with **Angular** and **JavaScript**, increasing user retention by 33% (Google Analytics)
- Integrated **RESTful APIs** with a **.NET Core** backend, cutting average query latency from 400ms to 300ms
- Deployed and tested 5+ backend features using **C#**, **PostgreSQL**, and **Postman**, used by 10k+ daily users

PROJECTS

DocRAG | Python, RAG, Supabase, AWS, Qwen, Typescript, React, JWT Auth, Redis caching

[Link](#)

- Led a team of 5 to design and deploy a distributed document retrieval platform supporting semantic search using **FastAPI microservices** and **AWS Bedrock**, achieving less than 150ms latency under concurrent load
- Built a production-grade **RAG pipeline** using **LangChain** and Pinecone Vector Database with hybrid retrieval (vector + keyword), **LLM context-grounding** and cross-encoder reranking to improve answer relevance
- Improved retrieval speed by 28% using Gemini embeddings, metadata filtering and **Redis query caching**
- Built an **async ingestion pipeline** processing 10k+ docs, containerized with **Docker** and deployed on **AWS EC2**
- Automated RAG evaluation using retrieval precision, recall, and answer faithfulness metrics on 500+ queries

BrowserBuddy | LangGraph, MCP, LLM Agents, Python, Redis, TypeScript, FastAPI

[Demo](#)

- Built an **agentic AI browser extension** for QnA, similarity search, and price comparison with reasoning
- Developed **multi-agentic LLM workflows** (FastAPI, LangGraph) with intent-based MCP tool orchestration
- Built a **scalable, secure system** with embeddings, vector search, Redis memory, and prompt injection guardrails

Stockgram | Java, Springboot, SQL, Postgresql, ScikitLearn, linear regression, GCP, Git

[Link](#)

- Built a **Java Spring Boot** app hosted on a **GCP VM**, for stock portfolios, analytics, and social networking
- Designed a **BCNF-normalized PostgreSQL** schema using indexing, **Redis caching**, abstractions to reduce query execution time by 38%
- Predicted Stock prices using **linear regression** and ARIMA on 5 years of data with optimized **SQL pipelines**

SysMon | Linux, Unix, Bash, Systems Programming, Concurrency, Multi-threading, C

[Link](#)

- Built a **multi-threaded Linux** tool in C using **POSIX threads** that tracks real-time CPU/memory usage
- Implemented inter-process communication using forks and pipes with **concurrent** process synchronization
- Automated builds and execution using Makefile and Bash scripts, cutting start up time by 50%

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, C#, SQL, R, HTML, CSS

Frameworks: React, React Native, Flask, FastAPI, Angular, .NET, TensorFlow, PyTorch, Scikit-learn, Langchain

Developer Tools: Git, Docker, Linux, PostgreSQL, Redis, AWS, GCP, Postman, Numpy, Pandas

Concepts: OOP, DSA, REST APIs, CI/CD, Agile, Unit Testing, Vector databases, RAG, MCP design, ML
